

## Customer service

How to increase your process reliability with BLEICHERT:  
Our after-sales service

Modular service concept  
to meet your demands

- Hotline and remote maintenance
- System check-up and preventive maintenance
- Instruction and training directly on site
- Original spare parts including warranty
- Retrofitting conversions, relocations and modernisations

# Successful production processes demand custom-tailored service concepts

The BLEICHERT service (here part of the team) works to maximise the availability of your plant

The better the service for your production facilities, the higher your benefit – plus reduction of the failure risk. This applies across the entire lifecycle. The custom-tailored BLEICHERT service concepts offer you:

- Preventive service against unplanned standstill
- Support in case of damage
- Improved utilisation of human and plant resources
- Reutilisation of old systems

Contact us – no one knows your production facilities better than we do!
