

Simply Roll®

Highly variable roller conveyor –
tool free assembly

- Highly versatile
- Lightweight and very stable
- Double ball bearing steel rollers
- Unbeaten cost-benefit ratio
- Robust with an extreme long life
- Tool less assembly with via “Patent pending” mounting system

Patent
pending

The innovative concept in lightweight roller conveyors

The kit

Simple to assemble

Assembled conveyor with stabiliser

What is so special about Simply Roll®

It is a patented tool free assembly by means of the newly developed plug-in system. In addition, the stable and lightweight construction is highly variable, taking full use of standard parts.

Simply Roll® – a particularly economical conveyor solution – with the added advantage of rapid adaptation to changes in operational procedures.

Key benefits for customers

- Fast and easy tool free assembly
- This in itself cost saving and flexible
- Solid double ball bearing rollers in steel
- The design allows for multi tasking
